## ABOUT ME

I highly motivated and passionate Flutter developer with a solid understanding of Dart programming and a strong foundation in mobile app development. I have hands-on experience in building and deploying cross-platform applications using Flutter. I have developed several mobile applications as part of my academic projects and personal initiatives.

## PROJECT EXPERIENCE

### MUSIC APP

Project Description: I build dynamic and user-friendly music application developed using Flutter, designed to offer an immersive and personalized music listening experience. The app is built with a focus on performance, seamless navigation, and an intuitive user interface, making it accessible for users of all ages. In facility of app you can do all function like play, pause, forward, backward song with also random play and single loop mode. I use radial slider for increase and decrease volume of song. I use many flutter packages in this project like just\_audio, audioplayers, google\_fonts many more. I give dark and light mode facility with unique drawer.

### SHAYARI APP

Project Description: I build shayari HUB application as academic project by using fully on GetX State management method. In facility of app you can edit shayaries, all texts propertise like size of font, color and boldness of font and also background color and shadow color. Also, you can add as many Shayaries and categories of it. User can share shayaries on Whatsapp as well and also download pic of shayari. I also use share\_plus, widget to image, path provider and many more packages.

### ACCOUNT MANAGEMENT APP

Project Description: I build Account Management App by Using SQF Lite Database for store Data. I use Cupertino widgets in application like date picker, alert dialog box, Cupertino Buttons, cupertino segmented control for selecting credit or debit of payment and also Cupertino Navigation. In facility of app, you can add people for credit and debit payment and also get print of data. I use sqflite and hive database in app. I use SQLite Database for crud operation. You can set your password also and get back-up and restore data of your account. I use many flutter packages in this project like path provider, intel, sqflite and many more.

### PUZZLE APP

Project Description: I build math puzzle application as project work. In this app I give dark unique UI. In facility of app, here multiple levels of puzzles given. I use shared Preference for store pass out levels. If you want to go next level of app, you must be complete current level, when you done current level then you can able to see next puzzle and it will be store by share Preference. I use many flutter packages like share Preference, google fonts and any more.

### E-COMMERCE APP

Project Description: I build simple E-commerce application as project work. In app, I use API calling and view of API data. You can also login by google Gmail or mobile number. In this app i use many flutter packages in this project like http, share preference, google fonts and many more. You can search product dynamically and also add in Wishlist.

### CALCULATOR APP

Project Description: I build calculator app as logic developed app. I give press effect of all button dynamically. I create all logic of calculation without using any packages. In this app all type calculation are workable.

## EDUCATION

**BSc.IT (2023-2026) | MTB campus**

**Shree Ramkrishna Institute of Computer Education and Applied Sciences**

**HSC 12<sup>th</sup> | Matric Global School**

2020 - 2021

Passed out GHSEB 12<sup>th</sup> in may-2021 with 83.45 %

**SSC 10<sup>th</sup> | Matric Global School**

2018 - 2019

Passed out GSEB 10<sup>th</sup> in march-2019 with 82.33 %

## SKILLS FLUTTER

- proficiency in Dart
- Git-hub
- Database
- state management
- Problem Solving
- API Integration
- Flutter Framework

## EXTRA SKILLS

- HTML
- CSS
- DBMS & ADBMS
- asp.net
- wordpress

## GitHub
